### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Sajovec on April 26, 2010.

The application has been amended as follows:

In the claims:

1. (currently amended) An extruded collagen film, made from an extrudable gel, wherein said film has:

a collagen content that consists essentially of porcine collagen, wherein said porcine collagen consists essentially of sow collagen;

a fat content, ~~wherein the fat content in the film is reduced from that naturally present in a pig to a level~~ below 20% on a dry weight basis of the film; and

a ratio by weight of collagen to fat in the film of at least 2.5 to 1,

wherein any collagen derived from sheep, poultry, birds and/or fish in said film is present in an amount of less than 10% by weight of the total collagen content in said film, and any non-sow porcine collagen in said film is collagen derived from young pigs and is present in an amount of less than 10% by weight of the total porcine collagen in said film, and wherein said film has an extrusion direction wet tear strength of greater than 300 gf/mm.

3. (currently amended) The film according to Claim 1 wherein the fat content ~~in the film is reduced to a level~~ below 18% by weight on a dry weight basis of the film.

19. (currently amended) A method of producing ~~an the~~ extruded ~~porcine~~ collagen film of Claim 1, wherein the collagen content of the film consists essentially of sow collagen, and the method comprises the steps of:

- producing defatted sow skins;
- forming the sow skins into an extrudable gel; and
- extruding the gel and forming a film.

20. (currently amended) The method according to Claim 19 wherein the sow[[s]] skins are defatted by mechanical defleshing.

21. (currently amended) A food product wrapped with the ~~porcine~~ extruded collagen film of Claim 1.

The following is an examiner's statement of reasons for allowance: claims 1, 3-6, 8, 10-16, 18-21 are drawn to an extruded collagen film, made from an extrudable gel, wherein said film has a collagen content that consists essentially of porcine collagen, wherein said porcine collagen consists essentially of sow collagen and a fat content. The weight ratio of collagen to fat in the film is at least 2.5 to 1 and any additional non-sow collagen present in said film is as recited in claim 1. A search of the prior art reveals that the instant claims are novel. Further, the prior art does not suggest the instant invention as claimed and is therefore non-obvious.

Claims 1, 3-6, 8, 10-16, 18-21 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marsha M. Tsay whose telephone number is (571)272-2938. The examiner can normally be reached on M-F, 9:00am-5:00pm.
